

Unlocking the potential of spatial biology with the MACSima™ Platform

Tuesday, March 19, 11:00 a.m. – 12:30 p.m. (PDT)
City of Hope, Beckman Research Building, Argyros Auditorium
1500 E Duarte Rd, Duarte, CA 91010

Spatial biology bridges the gap between cell phenotyping and tissue imaging by using high-plex approaches to unlock stunning possibilities in immunology and beyond.

- Learn about the latest advances in spatial multiomics with automated high-plexed imaging on the MACSima Platform
- See how our end-to-end solution enables the visualization of up to hundreds of markers in fixed tissues or adherent cells
- Explore the power of MACS® iQ View Image Analysis Software for an enhanced exploration of large high-parameter data stacks
- Gain deeper insights and see the whole picture by combining 3D imaging technology with 2D analysis

Complimentary lunch will be provided.
